Breathe • Relax • Flow

Flowborne Spirit is a meditative VR breathing game created by psychologists, long-time meditators and artists to help players relieve stress and cultivate deep relaxation. Players embark on a soothing journey through enchanted worlds, mastering deep breathing while immersed in captivating landscapes and mesmerizing soundscapes.

KEY FEATURES

- ✓ **Scientifically Designed**
Techniques rooted in mindfulness and stress relief research.
- ✓ **Stimulates Healthy Breathing**
Real-time breathing feedback rewards slow, deep breaths.
- ✓ **Immersive VR World**
Stunning visuals and tribal-inspired soundscapes enhance relaxation.
- ✓ **Perfect for Practitioners**
Supports stress relief, anxiety reduction, and meditation training.

"We created Flowborne VR to help people connect with their breath and experience deep relaxation in a way that feels magical and effortless."

Dr. Johannes Blum

Case Study: The future of pain relief

Doctors in Birmingham are pioneering the use of virtual reality (VR) to manage pain during kidney stone procedures - marking a first in the UK. Instead of traditional painkillers, patients wear VR headsets and are guided through a calming underwater breathing exercise of our VR app Flowborne.
